Aditya Deshpande
Front End Developer

Enthusiastic and motivated with a solid foundation in ReactJS, HTML, CSS, Core Java, SQL and JavaScript. Eager to leverage academic training to contribute effectively to a dynamic team. Passionate about creating responsive and user-friendly web experiences. Proven ability to learn quickly and apply new technologies effectively.

Experience

TechCiti software consulting pvt ltd

Software developer intern - 02 Nov 2022 to 02 Dec 2022

Contribution - Developed User Interface using Django.

Project Details - Client management system is used for manage the client details and project in any organization to maintain or access services related information for internal administration purposes.

Certificate - https://drive.google.com/file/d/1rTvZOqkk2MFtqzOHa7hWpcMMGzdvuShg/view?usp=drive_link

Projects

Master face attack on face recognition system

Problem statement: A study on LVE for generating master faces used various scenarios, databases, and face recognition software to identify traits and contexts for powerful master face formation. The analysis suggests that master faces originate in dense areas within facial identification systems, highlighting the importance of specific facial regions or features.

Solution - In this system, a face image dataset is pre-processed (resized, grayscale conversion), split into training and testing sets, and evaluated using a Convolutional Neural Network (CNN) to determine image authorization, revealing high accuracy. Advantages include efficiency with large datasets, low time consumption, and noise removal.

Team size - 1

Kids adaptation portal

Problem statement - Finding an orphanage within the city is time-consuming, with manual records and lengthy adoption procedures often causing delays due to unclear documentation requirements. This method is inefficient and may lead to inaccurate information about the child.

Solution - "Kiddos Adoption Info Portal," provides detailed information about orphanages, the children they care for, and the necessary documents for adoption. It includes modules for admin, orphanages, and users to efficiently exchange information. This platform aims to simplify and streamline the adoption process, making it accessible and user-friendly for the public and orphanages.

My Contribution - Developed User-Interface using the ASP.NET 2010.

Technical skills

React JS, HTML, CSS,

Java script, Core Java and SQL

Certification

Java full stack developer at JSPIDERS

Qualification

MCA Degree with CGPA 7 grade.
VTU Belgaum

BCA Degree with CGPA 6.5 grade.
Davangere University

12th PCMCS with 55%
Sir M V College Davangere

10th PCMCS with 60%
DRR School Davangere
